## Carranza Intimates He Will Not Agree to Any Intervention Plan

The note of E. Arredondo, Carranza representative here, to Secretary Lansing yesterday, follows:

"Upon hearing of the conferences which were to take place between Your Excellency, as Secretary of State of the United States of America. and the representatives of the republics of Argentina, Brazil, Chile, Bolivia, Uruguay and Guatemala, my natural impression was that they would have for a purpose to examine the Mexican situation from the point of view of international law, in order to estimate the value and respective position of the parties and contending factions, to the end of recognizing the one in which the requisites and conditions demanded by international practices in such cases would concur; but the persistence with which the press has been affirming that the parleys referred to have had for an object, and have even agreed now on, a plan for the pacification of Mexico, and the declarations attributed to Your Excellency by the press of today, have caused the constitutional government to feel justly alarmed, and therefore I have been instructed by Mr. Carranza to say to Your Excellency that although he has not an exact knowledge of the character of the above mentioned conferences, he has been informed

that Mexican affairs, with a view to solving, have been discussed. "Mr. Carranza and the persons who co-operate with him are of the profound conviction that if the American Government would know the true situation in Mexico, it would understand that the only possible, just and acceptable solution, would be to leave the revolution to follow its natural course until the complete victory of the party representing greater

necessities and popularity. "The constitutionalist government, represented by Mr. Carranza, abstains from passing any comment on the conferences that are being held, because it has no knowledge of their character and of the conclusions which may have been reached and because it does not want to afford the supposition that they are tacitly consented to by it: but at the same time it considers it its duty to inform the American government of the displeasure with which the Mexican government and people would view any act which would or might tend to frustate the success practically accomplished against the reactionary factions by the constitutionalist army, representing the hopes and ideals of the Mexican people.

"I renew to Your Excellency the assurance of my high consideration. "E. ARREDONDO."

# UP ONE SIDE OF THE ROAD AND DOWN THE OTHER

This picture gives a grim idea of war better than a thousand words of description. It depicts a German column moving toward the eastern fighting front, the men in full marching equipment and their officers riding alongside. On ther side of the road is a long line of ambulances, returning from the battlefields ahead, with the ending numbers of wounded. The poor fellows in the ambulances had previously marched to the front with the same springy step see in the picture. Tomorrow these fellows will be coming back—in the ambulances.
